

Counterfeit Policy

T&R Precision Engineering understands that counterfeiting is a serious issue and poses a significant safety hazard within our industry.

We have adopted a Counterfeit Policy to eliminate the impact of counterfeit products on T&R Precision Engineering and our customers. This is a zero tolerance Policy against knowingly and intentionally trafficking counterfeit goods.

T&R Precision Engineering does not use, nor condone the use of counterfeit products. We also expect our supply chain to adhere to our ethical business standards and mirror our practices and procedures.

To support this policy of ensuring that there is a low risk of counterfeit products entering our supply chain, T&R Precision Engineering maintains processes to ensure purchases are only made directly from approved suppliers such as OEMs, manufacturers, franchised distributors, or agents.

Should a suspect counterfeit or counterfeit product be found, T&R Precision Engineering shall quarantine such material and report the finding to the supplier and appropriate authorities.
